

# Automotive Zone Controller

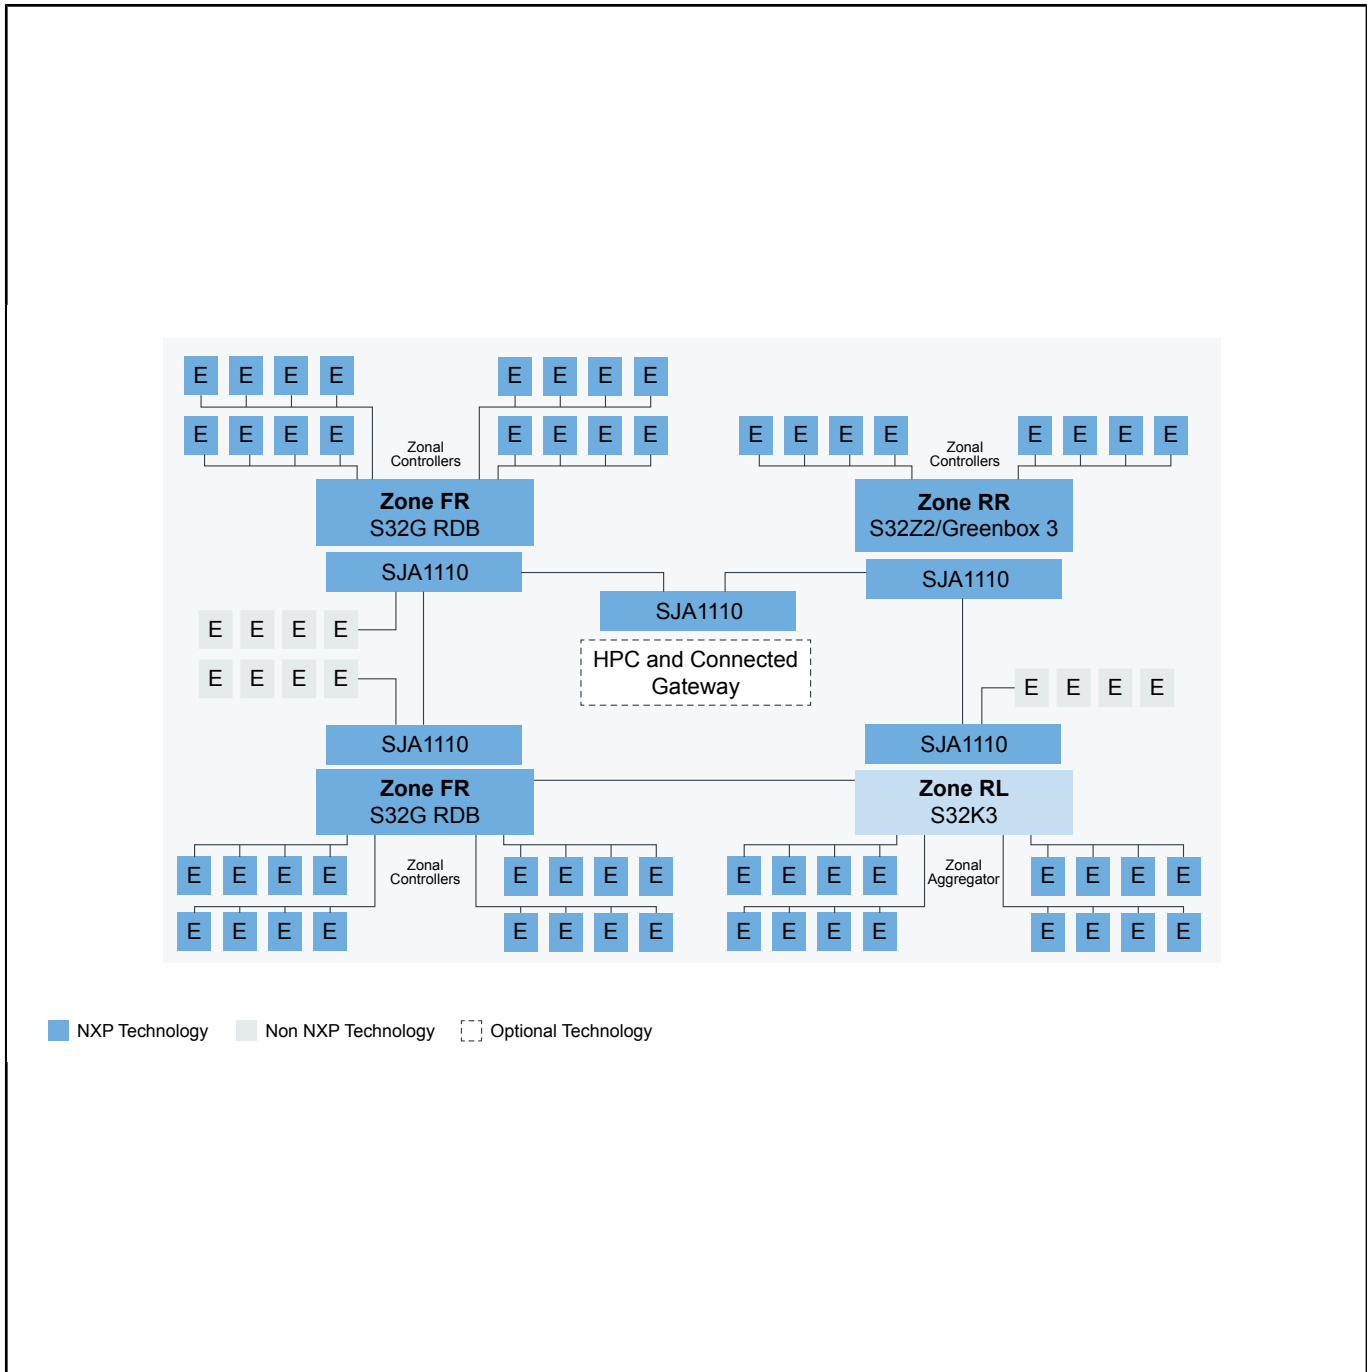

## AZCPOC

Last Updated: Apr 24, 2024

The NXP Zone control proof of concept (POC) platform is a zonal development ecosystem for OEM's POC work. It prototypes vehicle level zonal architecture with ethernet backbone, addresses technical challenges with potential solutions and implements key features required by zonal architectures including PDU gateway, PDU tunnel, DDS application, TSN features and performance benchmarking.

This POC is demonstrated on the S32G-VNP-RDB/GoldBox, [S32K3-T-BOX](#) and [GREENBOX-3](#).
