Application Software Pack: Conversa Voice Calling
APP-SW-PACK-CONVERSA-VOICE

Last Updated: Dec 13, 2024

This software pack helps developers build products that enable a complete voice call application using NXP's MCU and Conversa Voice Suite. This project speeds up the evaluation of Voice over Internet Protocol (VoIP) products and provides sufficient audio quality required to meet the Microsoft Teams specification and receive certification.
Conversa is a comprehensive full-duplex, hands-free telephony speech processing suite providing total control of uplink and downlink audio. Use this application software pack for a limited evaluation without restriction for ten minutes.

Download this Application Software Pack and follow the steps found in the corresponding application note for Conversa Voice Calling.
