

MPC5777C Battery Management Systems (BMS) and Engine Control Development Board 2

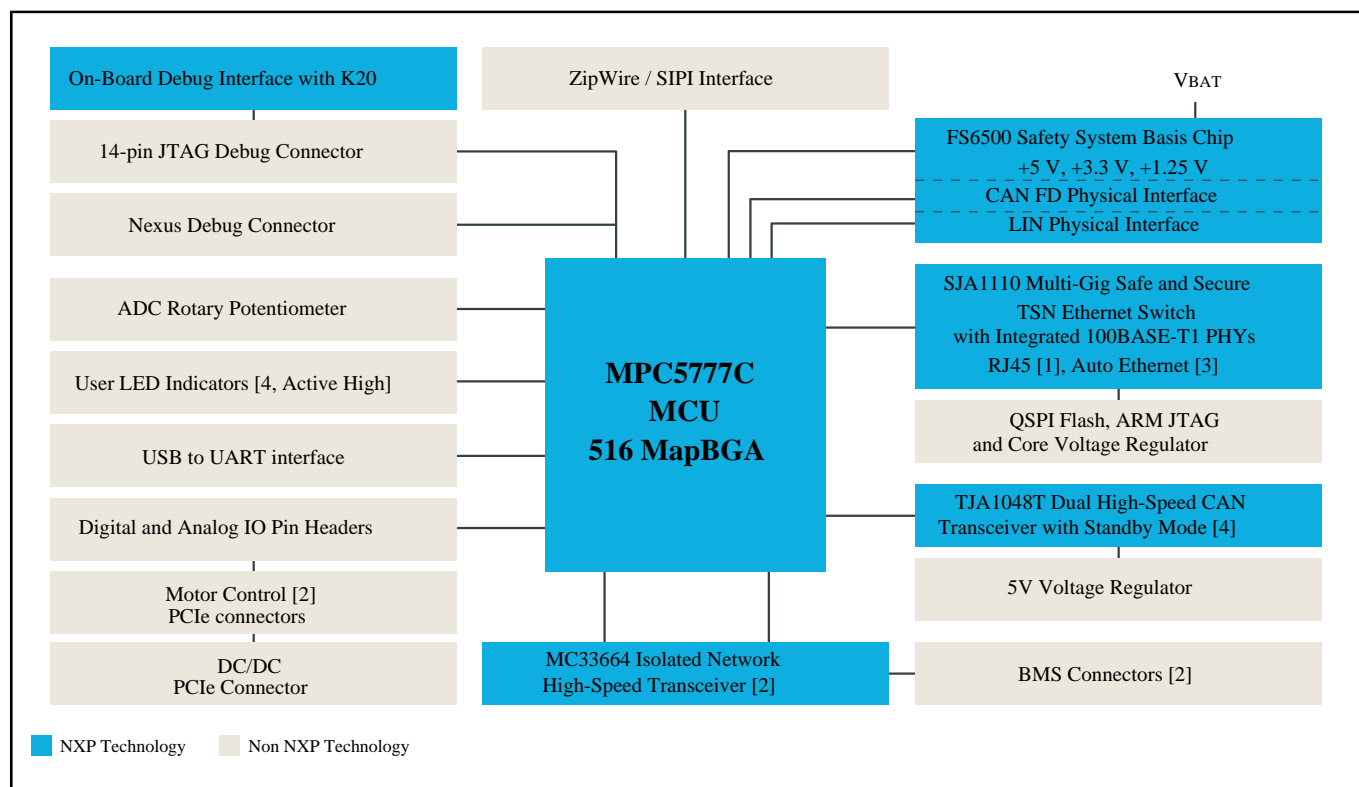

MPC5777C-DEVB2

Last Updated: Jun 12, 2024

The MPC5777C-DEVB2 is a development board engineered for a range of applications: from traction motors and battery management systems (BMS) to internal combustion engines and transmissions.

Based on the 32-bit Power Architecture® MPC5777C ultrareliable microcontroller, together with the FS65 system basis chip (SBC), the SJA1110 and TJA1048T Ethernet and CAN transceivers, the MPC5777C-DEVB2 facilitates hardware and software development, offering system performance, safety and security.
