

4 Mbit Serial SPI EEPROM

NXH5104UK

Last Updated: Dec 15, 2024

The NXP NXH5104 is a 4 Mbit serial electrically erasable and programmable read-only memory (EEPROM). It provides byte level and page level serial EEPROM functions, sector level protection and power-down functions. The device has been developed for low-power low-voltage applications and is provided with a Serial Peripheral Interface (SPI) compatible interface.
