

I3C, I2C–Bus, 2.0 °C Accuracy, Digital Temperature Sensor

P3T2030xUK

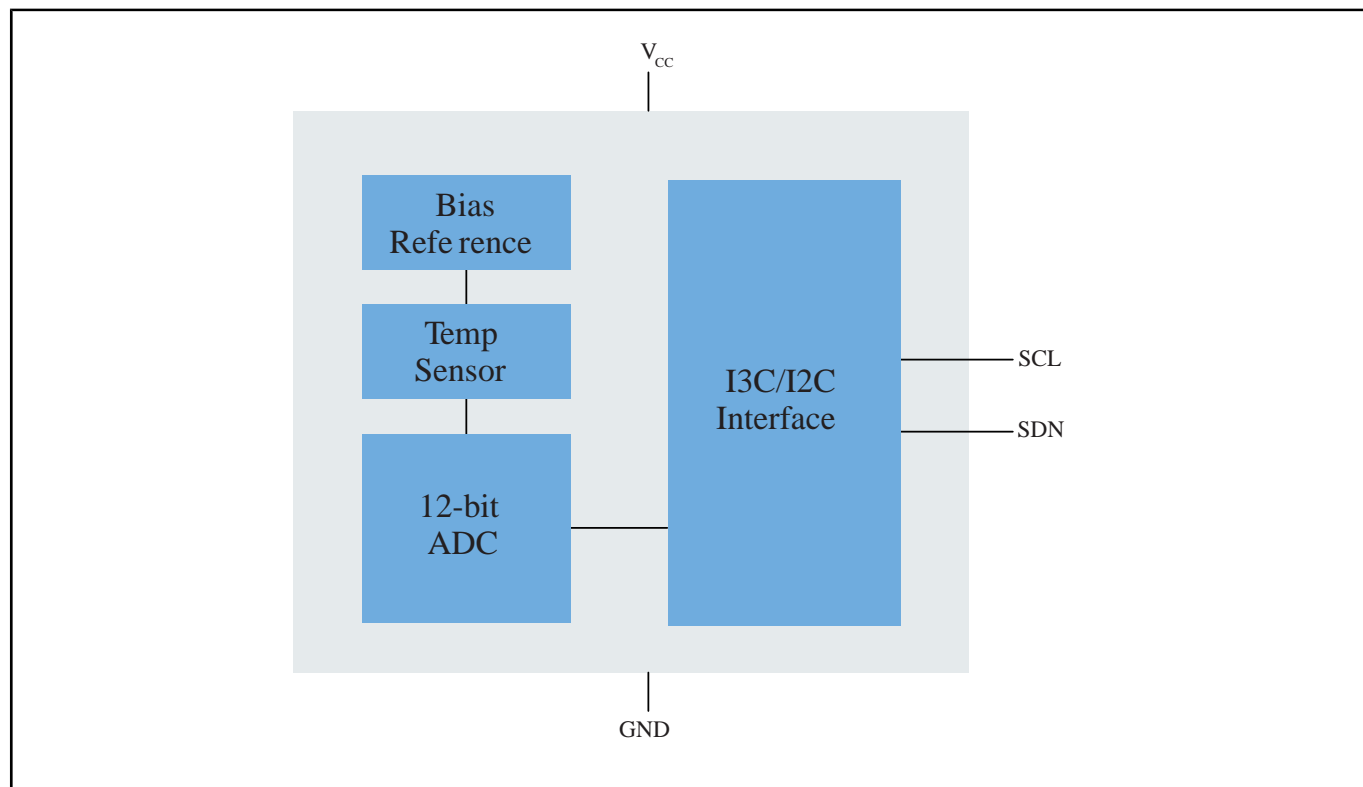

Last Updated: Apr 8, 2025

P3T2030xUK is a temperature-to-digital converter from -40 °C to +125 °C range. It uses an on-chip band gap temperature sensor and A-to-D conversion technique with an overtemperature detection.

The temperature register always stores a 12 bit two's complement data, giving a temperature resolution of 0.0625 °C.

P3T2030xUK can be configured for different operation conditions: continuous conversion and one-shot. The P3T2030xUK is available in WLCSP4 package and has 8 factory-programmed device address options.
