

Multi-Channel (4) PMIC for Automotive Applications – 4 High Power, Fit for ASIL B Safety Level

PF5024

Last Updated: Apr 15, 2025

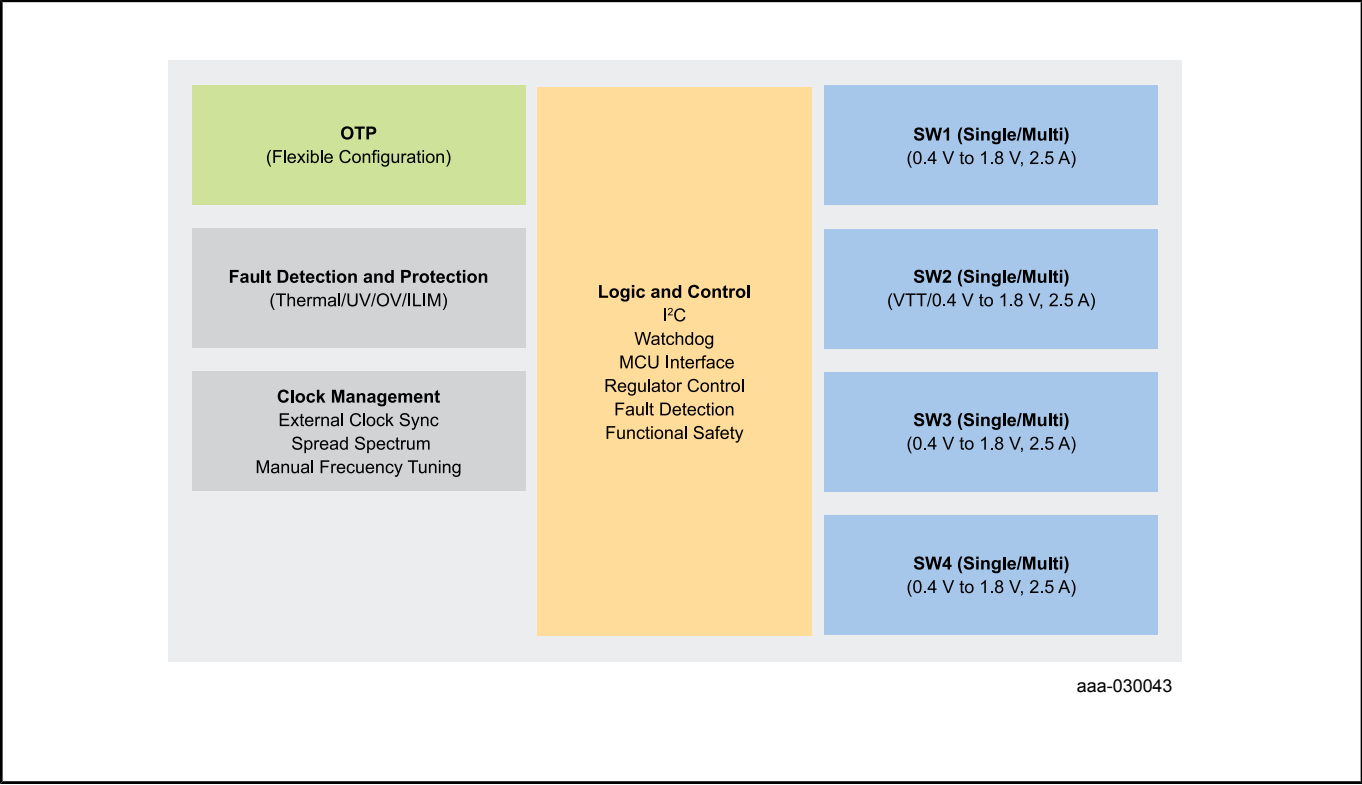

The PF5024 is NXP's multi-channel PMIC device designed to be used for high performance automotive and industrial applications. The PF5024 is also highly configurable making it a perfect companion and fit for various system level power requirements.

Integrated and independent voltage monitoring circuits ensure compliance with ISO 26262 standard and functional safety up to ASIL B level. The PF5024 is also available as a standard non-safety device for applications that don't require the ISO compliance.

The PF5024 is suitable for a variety of applications including infotainment, ADAS, vision, and RADAR either as a standalone power solution or also as a companion to another NXP PMIC like the [PF8200](#) or an SBC like the [FS8500](#).

This device is suitable for [i.MX](#) and [S32 processors](#) based applications.
