

eUSB2 to USB2 Redriver

PTN3222

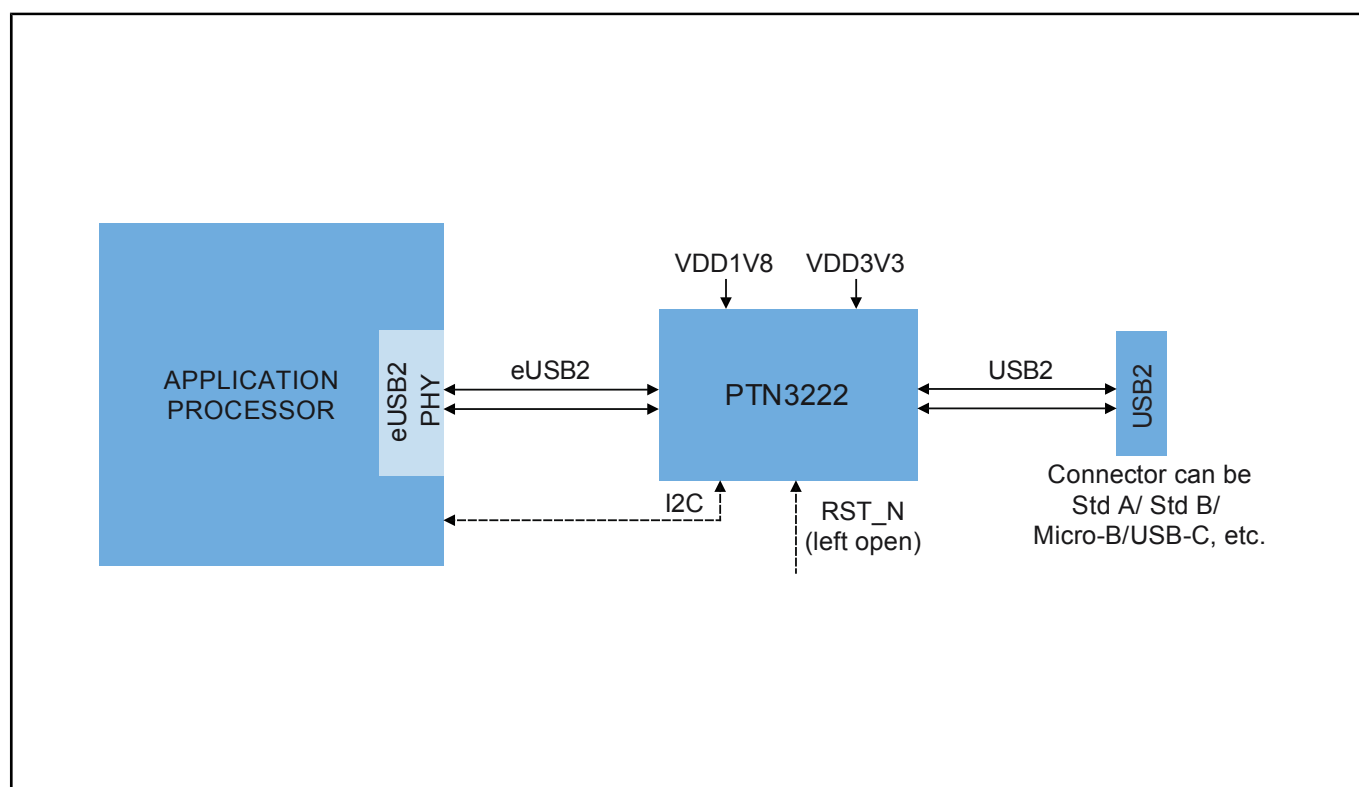

Last Updated: Feb 7, 2025

The PTN3222 device family is a set of 1-port eUSB2 to USB2 redrivers, enabling advanced process node SoCs to connect with traditional legacy USB2 interface. Family offers a variety of devices with different features to fit into the different SoCs available on the market. For more information about the family features options, please check the [summary table below](#).
