

P2041 QorIQ® Development Board

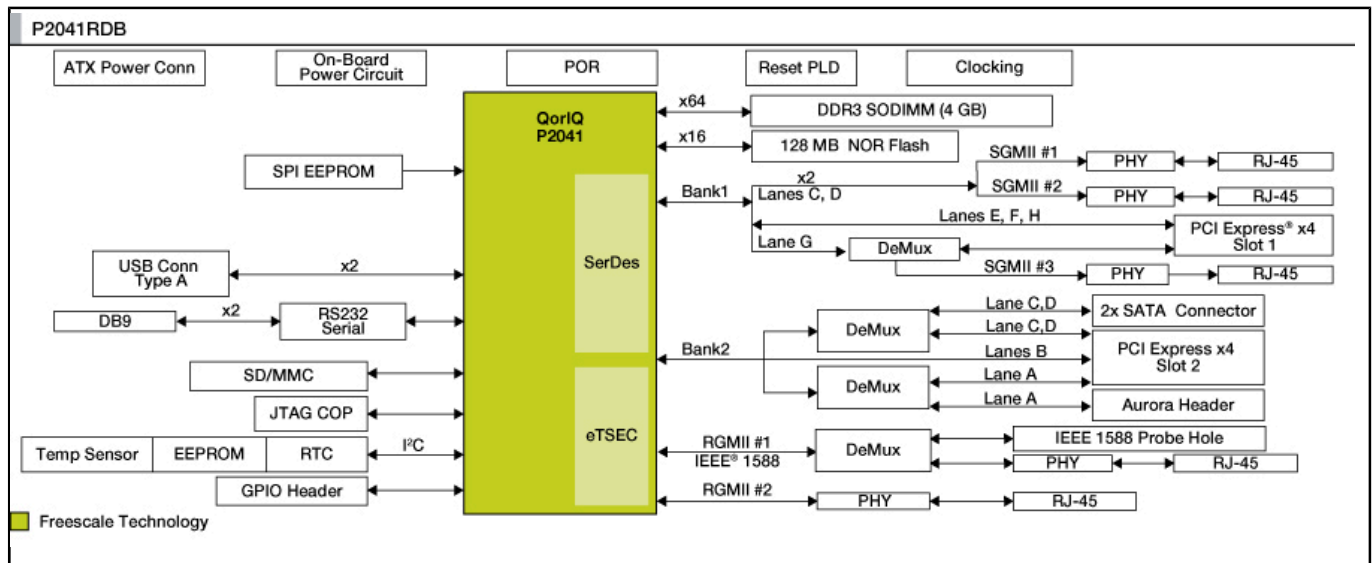

RDP2041BOARD

Last Updated: Apr 30, 2025

The NXP® P2041RDB is a compact (micro-ATX), highly integrated reference design board featuring the quad-core P2041 device.

The board, with its 1.5 GHz P2041 and rich I/O mix is intended for evaluation of P2041 and P2040 in networking and Ethernet-centric applications, such as control plane and mixed control plane/data plane in switches and routers, unified threat management, base station network interface and baseband cards, aerospace and defense, multifunction printers, factory automation and more.
