# S32 Software Development Kit for S32V

S32SDK-S32V

Last Updated: Dec 3, 2024

The S32 Software Development Kit (SDK) for S32V is a one-stop-shop for using low-level peripherals on S32V234 processors. The stage is set for seamless Vision processing by enabling the Cortex-M4 core for real-time operation and off-loading the more powerful A53.
