

# I<sup>2</sup>C-Bus to SPI Bridge

## SC18IS602B

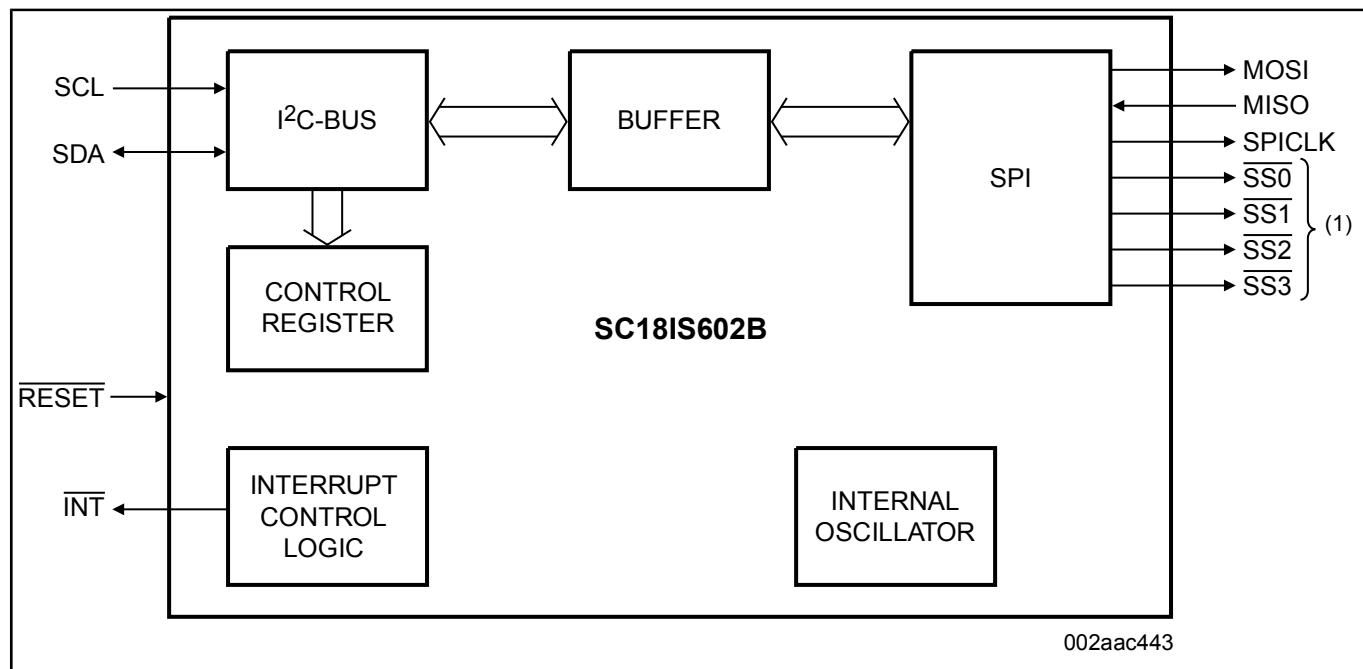

### Archived

This page contains information on a product that is no longer manufactured (discontinued). Specifications and information herein are available for historical reference only.

Last Updated: Aug 21, 2024

The SC18IS602B is designed to serve as an interface between a standard I<sup>2</sup>C-bus of a microcontroller and an SPI bus. This allows the microcontroller to communicate directly with SPI devices through its I<sup>2</sup>C-bus. The SC18IS602B operates as an I<sup>2</sup>C-bus target-transmitter or target-receiver and an SPI leader. The SC18IS602B controls all the SPI bus-specific sequences, protocol, and timing. The SC18IS602B has its own internal oscillator, and it supports four SPI chip select outputs that may be configured as GPIO when not used.
