

Evaluation Tool for Automotive Sensors

SEN-SPI-BOX

Last Updated: Feb 27, 2025

The NXP SEN-SPI-BOX kit provides a full-solution of built-in functionalities to communicate with any SPI/I²C sensor. The kit graphs real-time data, executes custom scripts and verifies sensor status. The board is a generic SPI/I²C evaluation board, compatible with some of the NXP sensor families such as FXLS90xxx automotive digital accelerometers.

Optional adapter boards may be purchased separately to add to the SEN-SPI-BOX kit PSI5 and/or DSI3 capabilities.
