

Multimedia Applications Processors – Dual Ethernet, Dual CAN, LCD Touch Screen, Arm9™ Core

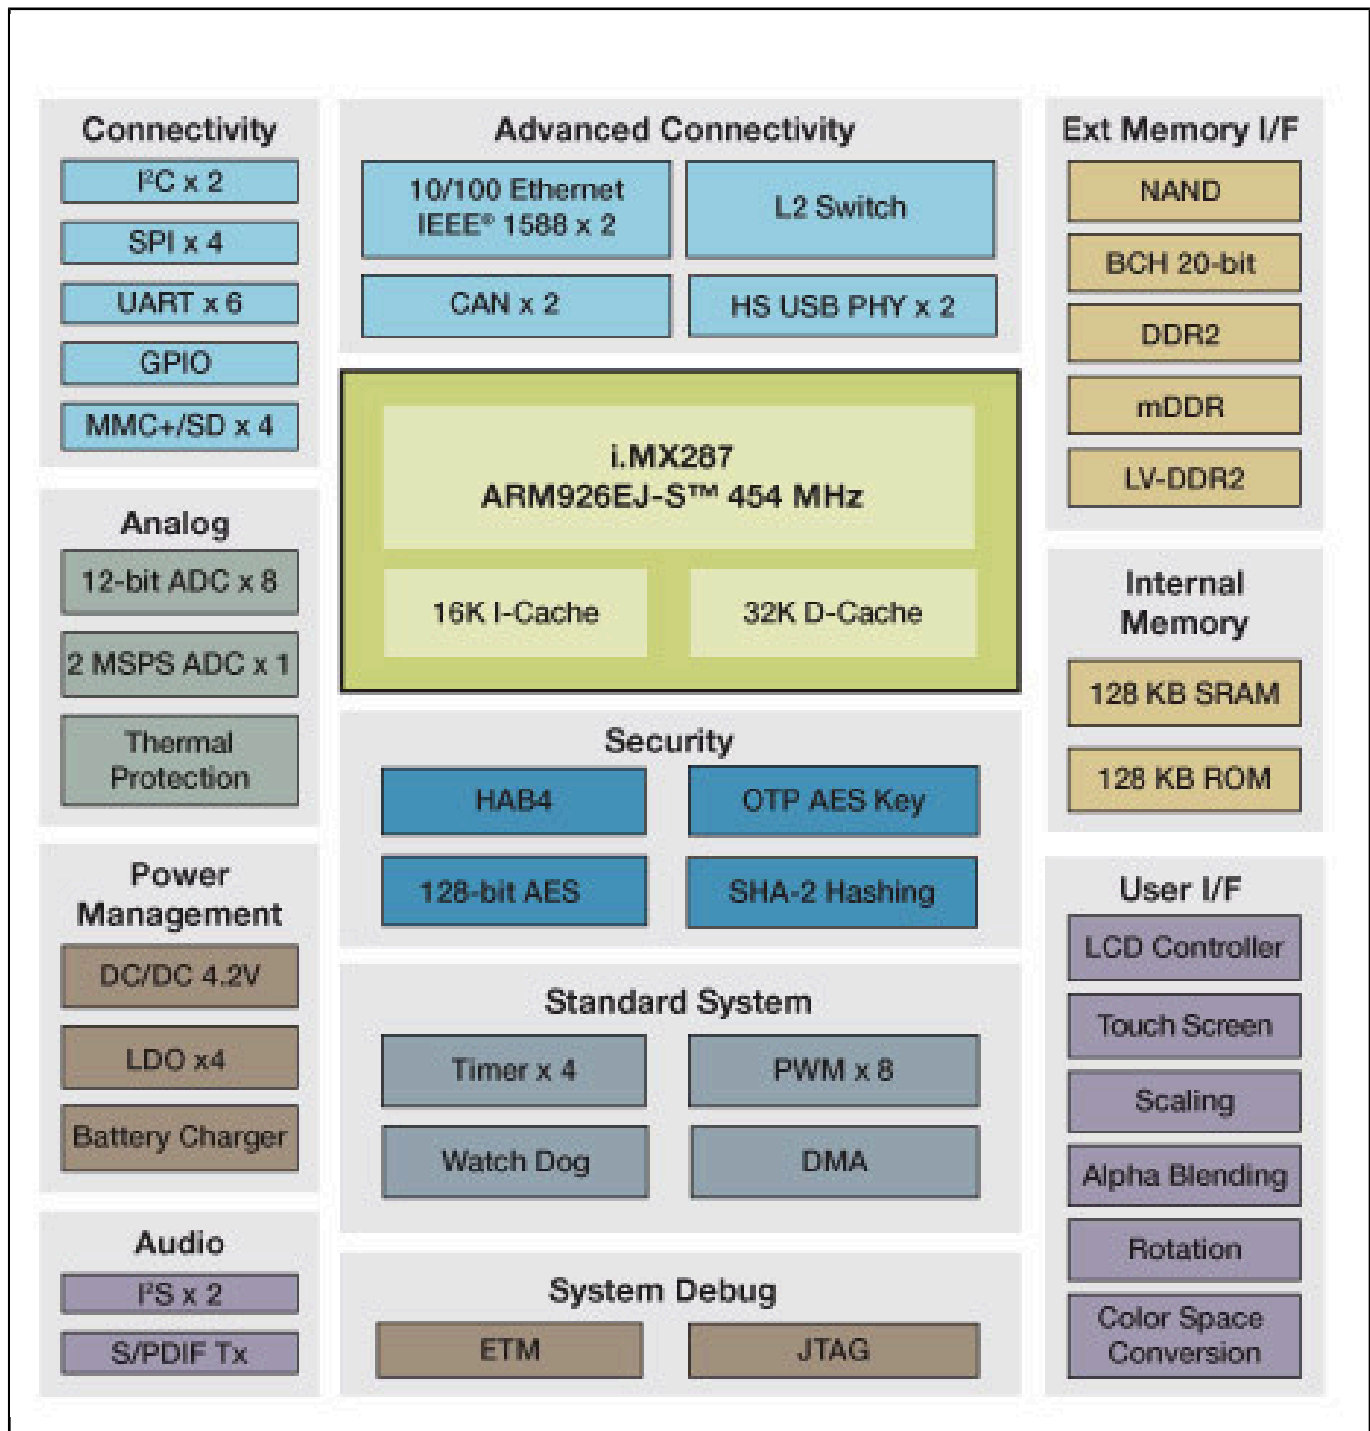

i.MX287

Last Updated: Jun 24, 2022

The i.MX287 multimedia applications processor offers an ideal fit for portable devices that require rich user interfaces with high color displays for presented information and user interaction.

- Reduces system cost and complexity
- Provides greater flexibility in system design
- Provides a high level of peripheral integration: display, connectivity, real-time control, security, networking
- Optimizes performance and power consumption
- Backed by strong enablement for designing differentiated products in less time
