

Multimedia Applications Processors – Integrated Electronic Paper Display (EPD), High Performance, Arm® Cortex®-A8 Core

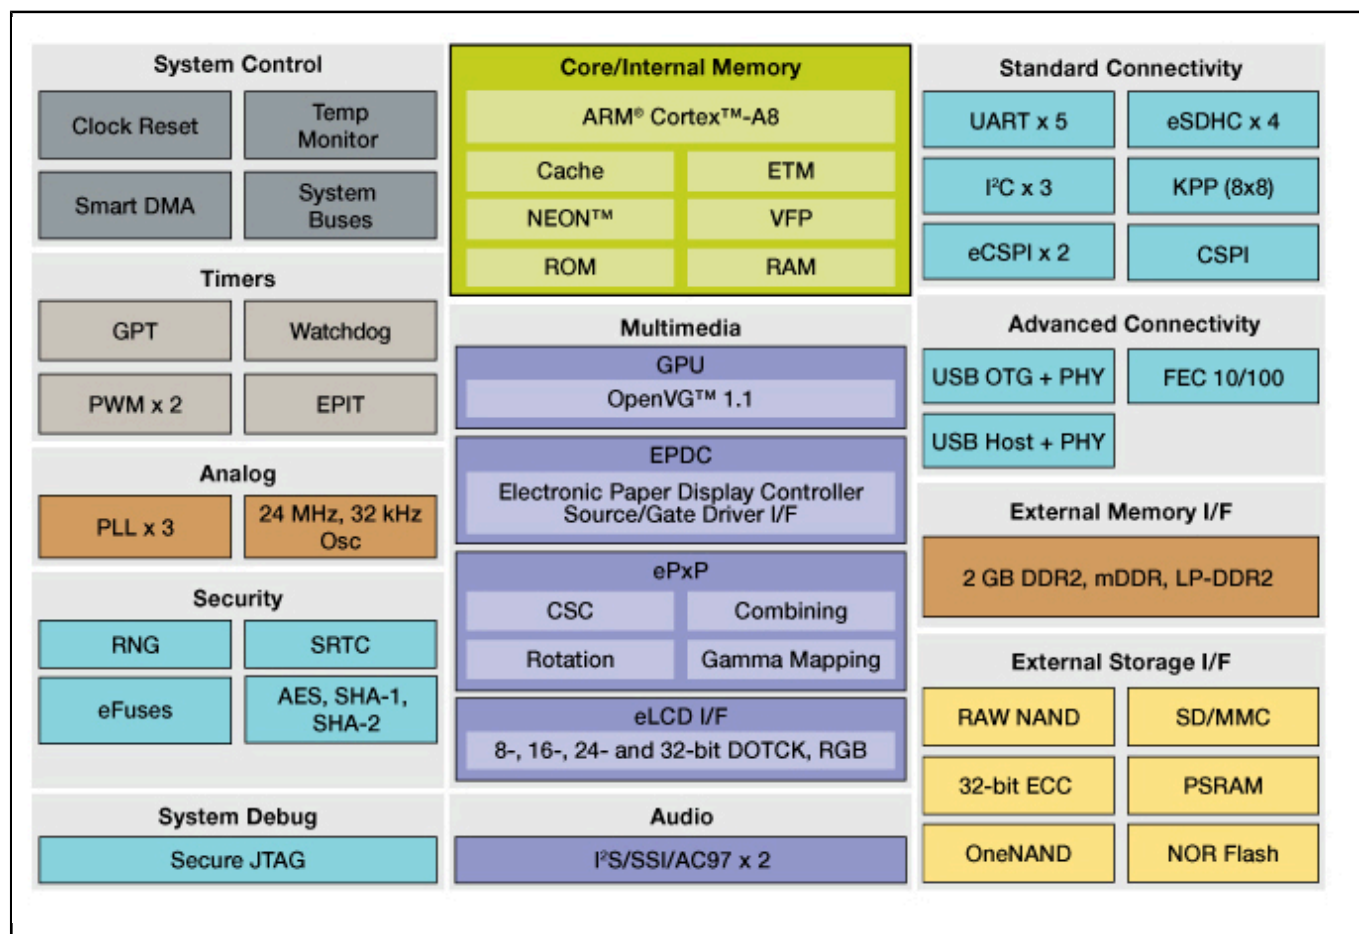

i.MX508

Last Updated: Dec 15, 2024

The i.MX508 processor is the first system-on-chip (SoC) designed specifically for eReaders that incorporates a high performance 800MHz Arm® Cortex®-A8 processor and an integrated hardware Electronic Paper Display (EPD) Controller certified by E Ink® to drive the latest and next generation Pearl™ panels. The i.MX508 enables reduced system cost, longer battery life and higher performance for faster page flips and a better reading experience.

The i.MX508 is supported by a companion NXP® power management IC, [MMPF0100](#).
