

i.MX 8X Family – Arm® Cortex®-A35, 3D Graphics, 4K Video, DSP, Error Correcting Code on DDR

i.MX8X

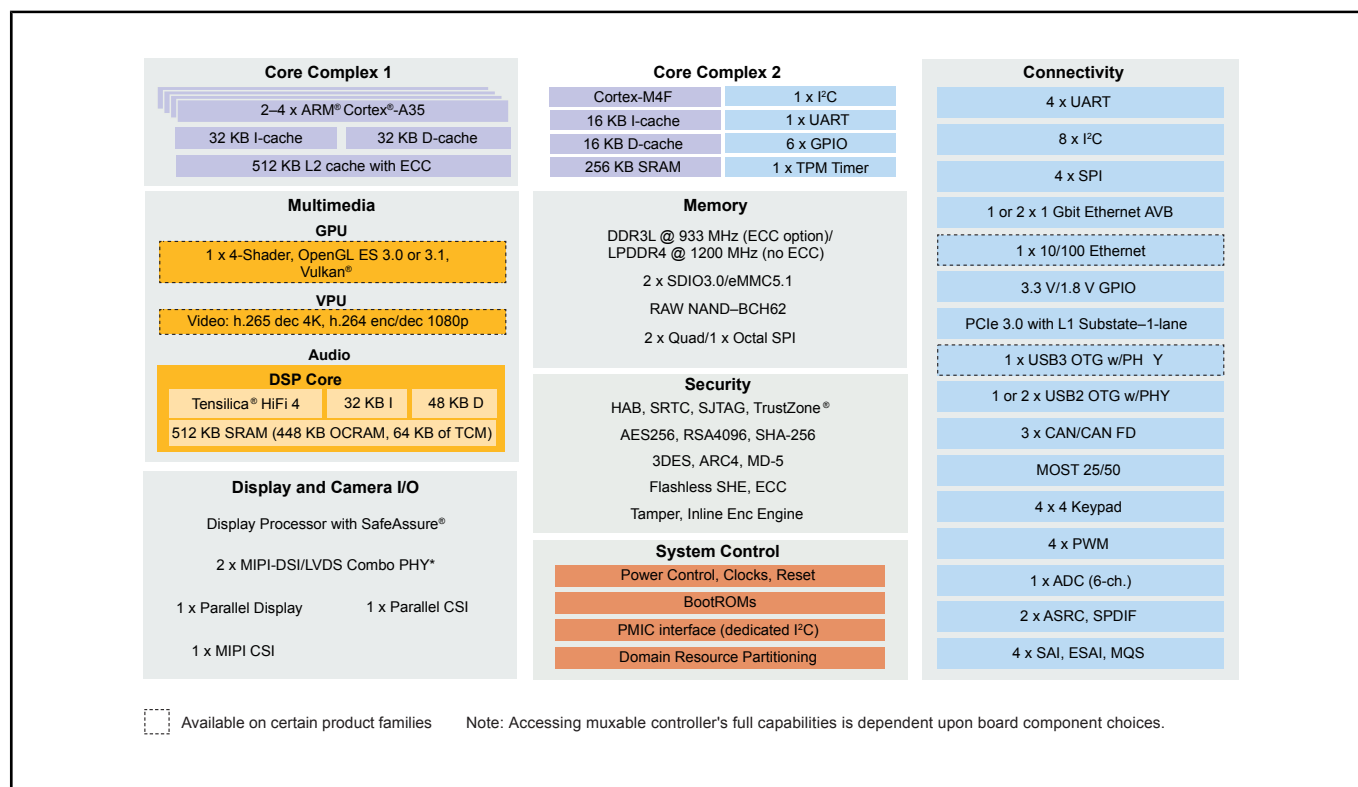

Last Updated: Dec 16, 2024

Extending the scalable range of the i.MX 8 series, the i.MX 8X family is comprised of common subsystems and architecture from the higher-end i.MX 8 family, establishing a range of cost-performance scaling with pin-compatible options and a high level of software reuse. Built with high-level integration to support graphics, video, image processing, audio and voice functions, the i.MX 8X processor family is ideal for efficient performance requirements. Example applications include industrial automation and control, HMI, robotics, building control, automotive cluster, display audio, infotainment and telematics applications.

i.MX 8 applications processors are part of NXP's EdgeVerse™ [edge computing](#) platform.
