The screenshot shows the NXP website for Android OS for i.MX Applications Processors. It features a navigation bar with links for PRODUCTS, APPLICATIONS, DESIGN, SUPPORT, and COMPANY, along with a search bar and social media icons. Below the navigation is a main title 'Android OS for i.MX Applications Processors'. The page is divided into two main sections: 'Android Current Release' and 'Android Past Releases'.  
  
The 'Android Current Release' section displays a table with three columns: 'Release and Documentation', 'Build Sources', and 'Supported Platforms/Demo Images'. The first row in this table corresponds to 'Android 11.0.0\_2.4.0 (Linux 5.10.52 kernel)'.  
  
The 'Android Past Releases' section includes a dropdown menu to 'Show 10 entries'. It features a table with four columns: 'Release', 'Build Sources and Documentation', 'Supported Platforms/Demo Images', and 'Incremental Releases'. The first row in this table corresponds to 'Android 11.0.0\_2.2.0 (Linux 5.10.35 kernel)'. A red arrow points to the 'Incremental Releases' link in the fourth column of this row.  
  
The 'Supported Platforms/Demo Images' column lists various EVK models for both current and past releases.
